

# Internet of Things Server Platform

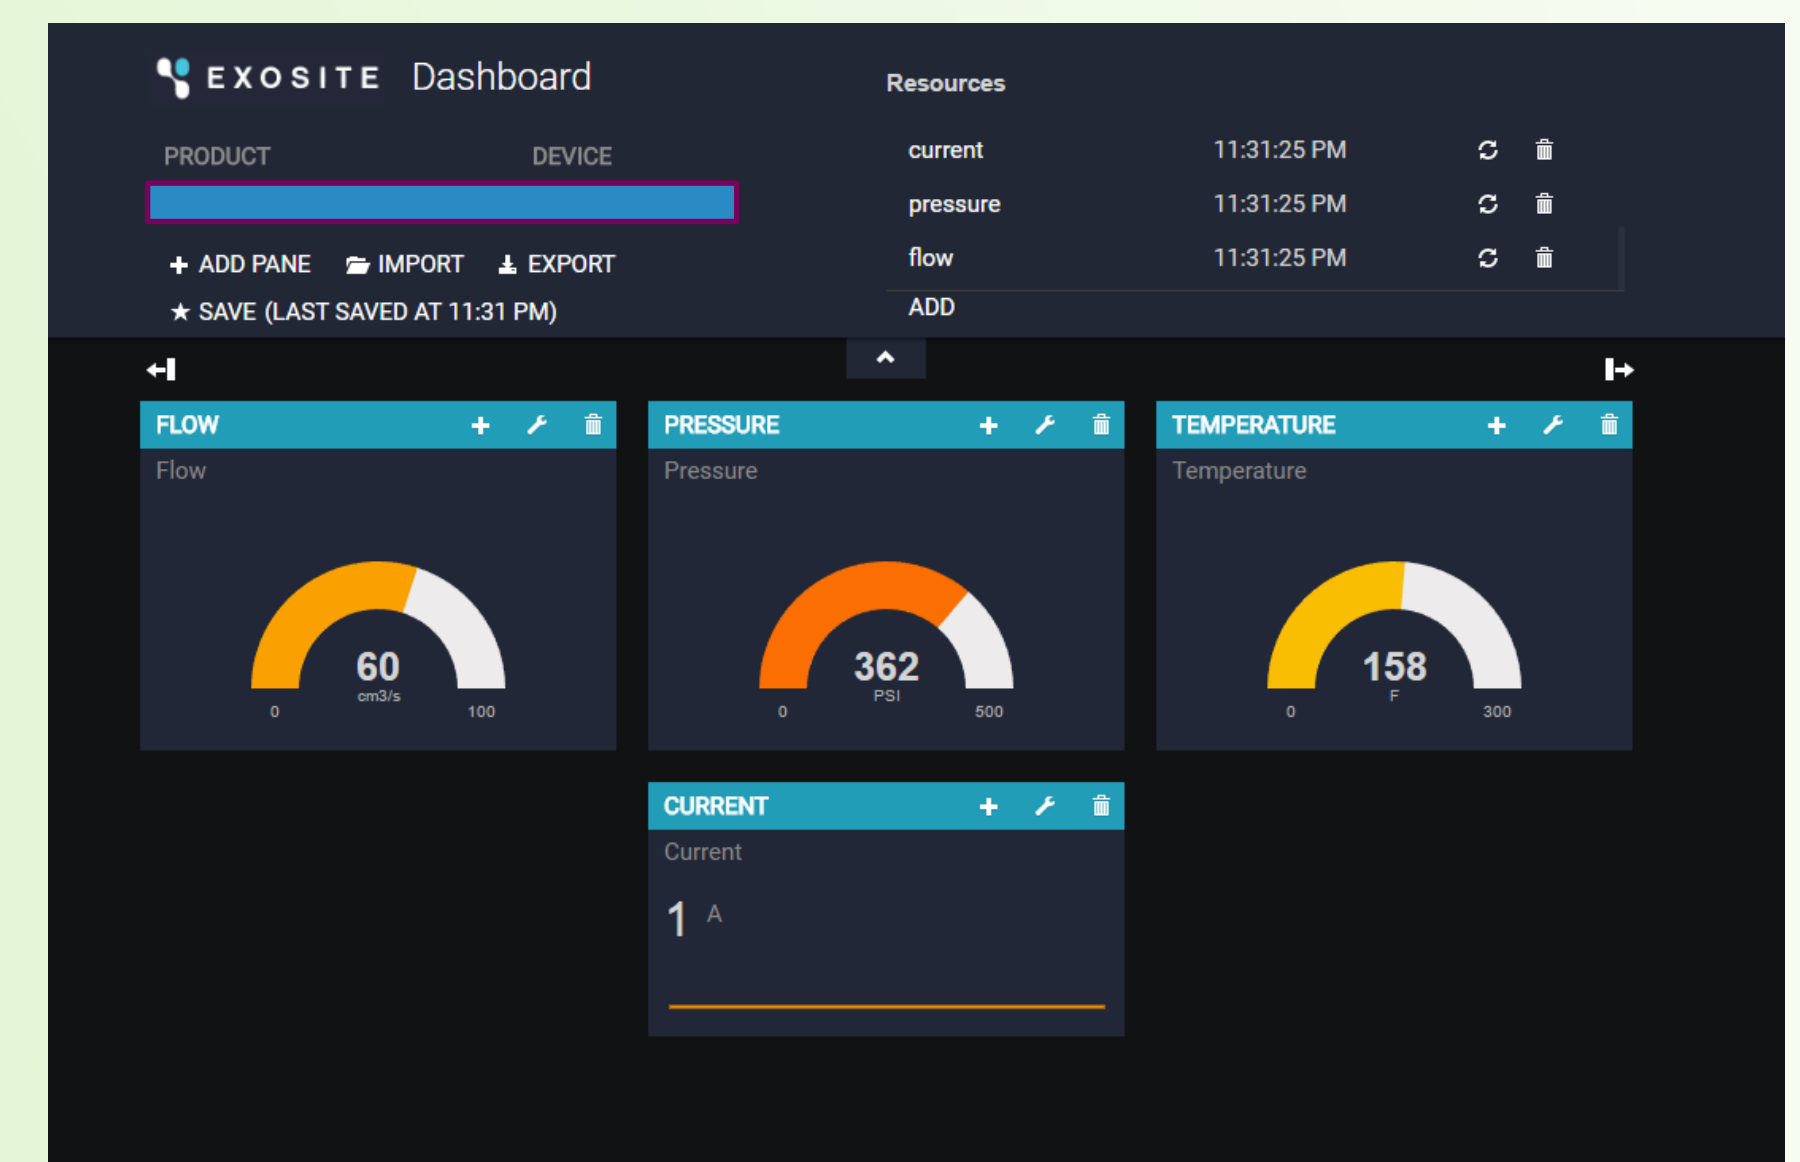

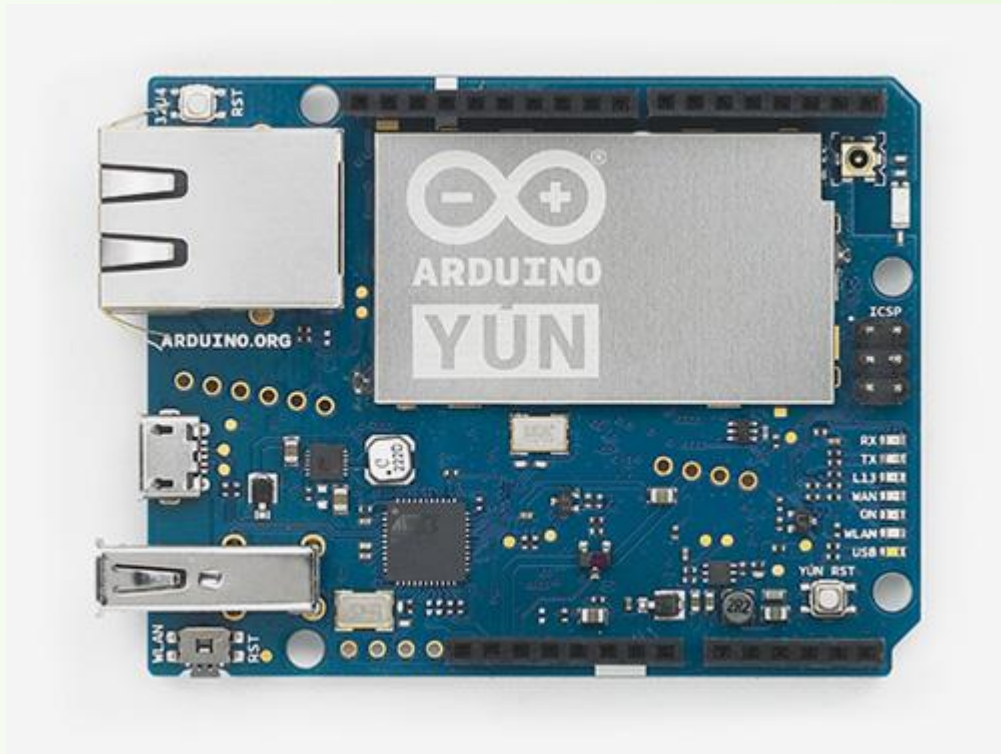

Brandon Rutledge, Christopher Snyder, Evan Spagnoletti, Zachary Wetzig

Instructor: Dr. Pong Chu

Project Sponsor: Parker Hannifin; Company Supervisor: Dr. Joe Kovach

*Department of Electrical Engineering and Computer Science, Washkewicz College of Engineering  
Cleveland State University*

**Problem: Create a solution for monitoring sensory data to improve maintenance and production.**

- Send data from sensors to cloud through Arduino Yun

- Murano stores data and passes it to a "Solution"

- Data can be accessed through solution

- Murano – Web-based IoT software platform
- Connect sensory data to the cloud
- View and manage data from anywhere

- Pull historical data from Murano in order to analyze via MATLAB, etc.
- Use authentication to protect company data.
