

Company:

DESMAN

1100 West Ninth Street, Suite 100

Cleveland, Ohio 44113

Title:

Junior Engineer

Position Description:

DESMAN is currently seeking highly technical Civil Engineers to join our design professionals. Our firm deals with the planning, design, and restoration of structures for a public, institutional, and developer client base. The successful candidate will be primarily involved in performing structural inspections/observations of existing structures consisting of structural steel and reinforced concrete, development of reports summarizing site observation findings and repair/renovation recommendations, the analysis/design of recommended repairs and renovations, and providing on-site inspections and observations during the construction phase. A minimum of a Bachelor's Degree in Civil Engineering is required with a structural concentration preferred. Experience with AutoCAD is required.

If you need anything else, please see my contact information below.

Thanks,

Matt Repasky, P.E.

Associate Vice President
