

Great Lakes Construction

Internships/Co-Op Positions

We are looking for Civil Engineer or Construction Management students for our paid fall co-op program. Do you have any students that would be interested in this opportunity? We have 6-8 positions available at this time. If you are interested in send your resume to Dr. Duffy. He will then forward your resume to Human Resources. Students can also submit their resume through "Handshake." Attached is a job description for the co-op if you have any inquiries about the job.

Corinne Kozlowski

Great Lakes Construction offers internships/co-op positions to students currently enrolled in a two or four-year college program that focuses on Civil Engineering, Construction Management, Construction Technology, or related fields. The position will entail use of general mathematics and science courses in addition to courses specific to the student's discipline. The individual will be placed on an active construction project assisting the Project Engineer in his/her daily duties. A Project Engineer at Great Lakes Construction is responsible for measurement and reporting of all daily quantities of work performed, scheduling and coordination of all material deliveries, creation of daily production plans and reports and maintaining project paperwork. The ultimate goal of the student and Great Lakes Construction should be for the student to learn about the construction industry and how the course work relates to the work being performed, gain exposure and experience to the construction industry in anticipation of future full-time employment, and most of all, have fun.
