

CVE is seeking a highly motivated full-time entry-level engineer to join our diverse team of professionals.

The new hire will have the opportunity to work on a variety of project tasks including various municipal engineering projects including drainage/stormwater study, analysis and design, roadway design, sanitary sewer design and rehabilitation and waterline improvements.

Requested Degree/Certifications/Skills

- Possesses a Bachelor's degree or higher in Civil Engineering
- State of Ohio Engineering Intern
- 0-2 years of experience in civil engineering
- Interest in public works improvement projects
- Experience with or interest in learning various types of design software including AutoCAD, OpenRoads, Civil 3d, HEC-RAS, etc.
- Ability to work independently and on a project team.
- Strong written and oral communications skills required
- Effectively communicate and coordinate with other team members
- Complete work on time and within budget
- Be energetic, self-directed and success-focused
- Possess a valid Driver's License

Job Responsibilities

- Preparing design details, calculations, plans and drawings for municipal design projects.
- Preparing technical specifications and cost estimates to support designs
- Prepare written documents and technical memos/emails summarizing project details.
- Demonstrates good oral and written communication skills.
- Multi-tasks and works collaboratively in a fast-paced, team environment.
- Assists team members in plan production activities.
