

Ohio Traffic Safety Design Engineer - The individual can be located anywhere in Ohio

Mead & Hunt is looking for a traffic safety design engineer to serve as the lead traffic engineer for Mead & Hunt's Ohio projects. The ideal candidate will have a strong design background and prior experience working with ODOT requirements.

In this role, the engineer will have the opportunity to work on cutting-edge traffic safety engineering projects and be part of the go-to design firm for safety projects in Ohio. The engineer will be responsible for writing projects scopes, designing and delivering the projects to the client, helping to manage projects, and meeting with clients.

Mead & Hunt has an office in Columbus, Ohio, but the individual can work from home anywhere in Ohio for this position. Please indicate location preference when applying for this position.

Mead & Hunt boasts a vibrant office culture and offers flexibility to employees! The firm also offers a comprehensive benefits package including competitive compensation, medical & dental insurance, 401 (k), bonus structure, ownership opportunities, and minimal travel.

About the Firm: Founded in 1900, Mead & Hunt is an employee-owned firm boasting more than 850+ engineers, architects, planners, and support staff in over 33+ offices nationwide. Mead & Hunt has been recognized as one of the Best Firms to Work For by CE News and the Zweig Group; listed as #25 on Zweig's 2019 Hot Firm list; and ranked 119th in Engineering News-Record's 2019 Top 500 Design Firms list.

Requirements:

- BS in Civil Engineering or related engineering discipline.
- 5-15 years of related experience.
- Licensed Professional Engineer.
- Prior experience working on traffic safety design projects preferred; individuals with related experience in traffic signal design, traffic control, traffic crash analysis, traffic studies, or roadway design will also be considered.
- Prior experience working with the Ohio Department of Transportation requirements required.

To apply email Gail@rcassoc.com

We are also looking for a number of additional positions (relocation would be provided):

- Deputy Transportation Engineering Leader (Denver, Colorado)
- Senior Traffic Engineer (Albuquerque, New Mexico)
- Licensed Traffic Engineer (Can be located anywhere in the Midwestern US)
- Roadway Design Project Manager (Indianapolis, Indiana)
- Roadway Design Project Engineer (Jacksonville, Florida)
- Central Florida Transportation Leader (Can be located anywhere in the Tampa/Orlando/Central Florida region)
