

# Human-Machine Systems 2023 Summit

## Schedule and Participants

The Center for Human-Machine Systems  
at Cleveland State University

Wolstein Center  
2000 Prospect Ave, Cleveland, OH

September 22, 2023

# Welcome from The Center for Human-Machine Systems

Welcome to the 2023 Human-Machine Systems Summit in Cleveland! We extend a warm welcome to all participants as we embark on a journey to explore the intricate interplay between humans and our tools and technology. This inclusive gathering seeks to highlight the diverse perspectives of the experiences of folks with disabilities, fostering discussions on adaptive and rehabilitation technologies, accessibility, and educational design. Let's collectively envision and wayfind towards a future with inclusivity for all.

## What is the Summit all about?

The goals of the 2023 Summit are:

1. Identify community partners with whom we can work to enhance our graduate research program.
2. Define specific knowledge, skills, and attitudes our students need to successfully partner with the disability community.
3. Identify the elements of partnerships that are attractive to members of the community.
4. Define specifics of interactions between our students and the disability community.

# Schedule

**Location** for all events is East Wing A & B on the 4th floor.
